

It has been brought to my attention that the NAB is trying to halt the growth of XM radio. Specifically, through petition 04-160, the NAB is trying to curtail XM's ability to provide traffic and weather reports...how brazen...how arrogant...how disturbing. In a true open marketplace, if your competitor delivers a better product or service, you regain your position by improving your own product or service...not by running off to some regulatory agency and whining. There is no possible reason for the FCC to take any action on this petition other than to dismiss it completely.

Sincerely,

David M. Cohen
